The drawings in both illustrations look the same because they are black and white transparencies. They almost completely deprive

the information of any color other than black. Luckily, good quality filmstrips exist for printing, and you can now purchase any of them on the Internet. This book is a kind of manual for those who want to be able to photograph black-and-white transparencies and are learning how to do it. These works will serve as an example of black and white. The reader may refer to the image shown in Fig.

1.1, and then adjust the print settings according to his own taste by closing the picture display. However, further lessons he will receive will be in the color of the overhead projector.
