R12 to R13: In AutoCAD 2012, Microsoft Visual C++ was used for graphics rendering in both Win32 and X64 builds. AutoCAD 2012 used the OpenGL graphics technology and DirectX 11 for this purpose. The drawing model was reengineered with a modified Graphical Processing Unit. In 2013, Microsoft Visual C++ was replaced with the Microsoft Visual Studio 2012 Platform Toolset. The architecture is built upon the .NET Framework 4.5.1. New features were added to the native API, including multi-threading, graphics improvements, updated rendering support and better integration with VS. For AutoCAD 2014, the DXF and DWG File formats are now handled natively by the Microsoft Windows.NET Framework 3.5. In AutoCAD 2015, the native DXF and DWG formats are handled by the .NET framework 4.5.1. In AutoCAD 2016, the native DXF and DWG formats are handled by the .NET framework 4.6.1 and native OpenGL. R14 to R18: AutoCAD 2011 to 2017: Supports XStream, XML, Xml2Vsd, Soap, ODF, OLE 2/3. AutoCAD 2013 and earlier: Supports: XStream, XML, Xml2Vsd, Soap, ODF, OLE 2/3, Print Management (WMIT), Print Preview. AutoCAD 2014 to R18: Supports XStream, XML, Xml2Vsd, Soap, ODF, OLE 2/3. Adobe Illustrator, CorelDraw and Macromedia FreeHand products can import and export AutoCAD DWG files using the Open Design Alliance Common Data Format (OpenCDF). LayoutEngine Design module: LayoutEngine module, the most common CAD data is to store an external library, which can be used to layout the design. Vectorisation module: Vectorisation module is used to export a scaled version of the design, for output only. Numbering module: Numbering module is used to print a one-up or one-down designation on the design. Rasterisation module: Rasterisation module is ca3bfb1094

Q: JavaScript: update list of radio buttons I have a list of radio buttons and I want to add a radio button to the list. Yes No The javascript code I tried is: var radioForm = document.getElementById("radioForm"); var radio = document.createElement("input"); radio.type = "radio"; radio.setAttribute("id", "radio-3"); radio.setAttribute("name", "radio"); radio.setAttribute("value", "No"); radio.setAttribute("type", "hidden"); But, the radio button doesn't appear on the form. Thanks A: No need for Javascript at all: Yes No A: You have to create the input tag, but also assign the value of type hidden. The code for that would look like this: var radioForm = document.getElementById("radioForm"); var radio = document.createElement("input"); radio.type = "radio"; radio.setAttribute("id", "radio-3"); radio.setAttribute("name", "radio"); radio.setAttribute("value", "No"); radio.setAttribute("type", "hidden"); radioForm.appendChild(radio); See a demo here:

What's New In?

Get a quick look at a 2D drawing with the new Show Floor View, that allows you to see all of the floor plans in a 2D drawing. Use the new Zoom In command to quickly see a portion of the floor plan. Using the new Single-Click Toggle and Reveal On/Off Commands, you can now quickly and easily toggle your drawing windows to display or hide your work. AutoCAD's powerful new integrated search functionality allows you to view drawings, add notes, and explore drawings from within AutoCAD's search feature. Airprint, Airbrake, and AutoPlace: Get a new 3D visual of your drawing, and send it to a connected printer or screen. With AutoPlace, you can put multiple objects into your drawings by 3D clicking, dragging, and panning in the 3D view. AutoPlace also makes it easier to design parts from your drawings in 3D by showing them in the 3D view, and then copying and pasting them back to the 2D view. AutoCAD's new color picker is much faster and easier to use than the previous version. You can quickly choose colors from the hex and RGB system, and the new "Magic Wand" feature allows you to easily pick colors and then apply them to your drawing. Share PDFs and links from within AutoCAD: Send drawings from your 3D modeling software directly to AutoCAD. View and print your 3D drawings from within AutoCAD. Access and interact with CAD drawings over the web. With the new PDF Import, select a 2D PDF document and place it into your drawing. The same PDF can be placed in more than one location. A new import option allows you to insert a hyperlink into a drawing, which can then be displayed in the Sidebar. Searching and browsing across CAD drawings has never been easier. The Sidebar is now more interactive with the addition of a new Content Browser and Scroll Bar. A new Sort and Search command has been added to the ribbon. Type a search phrase to search for drawings based on their name, category, keyword, or description. Raster graphics have improved: Raster editing has been improved and is now faster, more accurate, and easier. Colorpicker control has been improved, and now includes the new "Magic Wand" feature.
