What's New In PsPadEditorCapaLib?

JustLib is a free collection of useful extensions to any standard PSPad environment. The library currently contains over 100 function lines of AutoIt3 and VBScript. This extension includes all features of PsPadEditorCapaLib. The script contains all the options that can be found in the CapaLib Lib in the regular PSPad library. JustLib has the option to set the "settings.ini" file for the library using a custom routine or the executable. Other extension options include highlighting the syntax functions, access to all fonts, mouse click bindings and other commonly used options. This extension also features numerous mouse shortcuts such as "Ctrl + F9" and "Ctrl + F10". This version also features Help and Info options that can be accessed, from within the script, by using the two shortcuts. Moreover, the user is informed about the current state of the CapaLib and JustLib libraries using various means. This includes the ability to view the list of function in the library, the current location of the script, or the status of the PsPadEditorCapaLib. Additionally, the user can check for any error in the "settings.ini" file. Programmers are thus alerted in case the.ini file is corrupted or inaccessible. PsPadEditorCapaLib is compatible with several versions of PSPad. In order to avoid potential conflicts, the library is organized in function files that are compatible with specific versions of PSPad. PsPadEditorCapaLib on Project Valet (4.5+): JustLib is a free collection of useful extensions to any standard PSPad environment. The library currently contains over 100 function lines of AutoIt3 and VBScript. This extension includes all features of PsPadEditorCapaLib. The script contains all the options that can be found in the CapaLib Lib in the regular PSPad library. JustLib has the option to set the "settings.ini" file for the library using a custom routine or the executable. Other extension options include highlighting the syntax functions, access to all fonts, mouse click bindings and other commonly used options. This extension also features numerous mouse shortcuts such as "Ctrl + F9" and "Ctrl + F10".
