But right now i am watching a 3D 1080p DVD movie from the Basement and its so great and amazing. I thought there would be something like K-9 or you know something like that but I don't remember the name right now. But that probably would be even better. I did find "something like that" though. There are tons of helicopter simulators. So, i don't know why i am saying all this, there is a old game called "Sonic the Hedgehog 2" that really helped me a lot with controlling a helicopter. Here is a picture from the game, i just found it. I am a huge Sonic fan, i love the old games and i got my first gameboy when i was 6. It was a christmas present with my mom and dad. It has 300 levels, in the old copy it was called "Super Sonic" and if you completed all the levels you could get a special medal and there was one called "Sonic World Record" if you had a high score from the game you could win a special prize and what is better it has a time trial in the game. I really hope you like this, I wish i could create more but i have a couple of things to do for a school project. If you would like to learn more about my project, just click 6d1f23a050
